

Apache Spark Expert

City: Apache Spark Expert

Recruiter name: Marusteri Georgiana
Cosmina (ERNI)

Role: Senior

Recruiter email:
georgiana.marusteri@betterask.erni

Description

ERNI is a Swiss-based consulting company with more than 500 employees internationally. We focus on software engineering, our customers come from different areas and we implement our projects using agile methodologies like Scrum. We support customers in high-tech, financial services and many other domains in improving their processes and technologies. Join our team and jump into a project for one of our customers, one of the leading reinsurers in the world. ERNI is supporting the Zurich branch of this customer with SW development services.

Responsibilities

- In the distributed team, you will be the go-to-person for Apache Spark
- You will be part of the team developing and maintaining a financial risk modelling system for one of the most successful reinsurance company
- You will work remote with occasional business trips to Zurich once the COVID19 pandemic situation ends in Europe

Job requirements

Must have:

- Experience building complex, highly scalable backend application
- Experience in numerical programming, simulations, and algorithms
- Experience with Apache Spark, PySpark, and SQL
- Experience with Python, especially with NumPy, Pandas & SciPy
- Fluent in spoken and written English

Nice to have:

- Knowledge of Azure or AWS cloud solutions
- Proficient understanding of GIT and DevOps standards
- Experience in asset management is an advantage
- Some experience with Databricks platform

Benefits

- Opportunity for self-improvement and career growth
- Internal & external software development education and trainings (certifications)
- Medical Services Subscription
- Flexible working time
- 22 days holiday / year + 1 extra day of holiday for every year working at the company (up to 25)
- Meal Tickets
- Referral bonus
