

Backend developer

City: Sant Cugat el Vallés - Barcelona

Recruiter name: Perarnau Jimenez Claudia (ERNI)

Role: Professional

Recruiter email: Claudia.Perarnau@erni-espana.es

Description

One of our clients is a managed service project to support a business critical application for the medical sector. ERNI has been working for three years giving full Level 3 support to the biggest blood analysis system in the market, used by Hospitals and Laboratories.

Responsibilities

SW-Engineering:

- Design of units and components meeting the technical requirements (functional and non-functional)
- Transformation of the design into code.
- Implementation and performance of SW-tests on unit and integration level.
- Provisioning of documentation on all levels (code, unit, test, ...)

Support of system tests and of the global support organization:

- Analyzing of incidents, problems and defects.
- Fixing SW-defects.
- Provisioning of patches and releases.

Support in sprint planning by:

- Analysis of the product backlog items.
- Estimation of the work effort for sprint backlog.

Support in sprint evaluation by:

- Support of the presentation of the sprint deliverables.
- Support of the continuous improvement by providing feedback in the sprint retrospective.

Job requirements

- Cache experience (minimum 2 Years)

-
- Java experience (Or any other OOP) > 5 Years.
 - Unit Testing experience.
 - Agile or Knowledge about collaboration techniques and social competence in order to guarantee seamless communication between both parties.
