Full Stack Engineer

City: Cluj-Napoca

Role: Professional/Senior

Recruiter name: Eliza Ciuciui

Recruiter email: eliza.ciuciui@betterask.erni

Description

Are you looking for new opportunities? Do you want to grow up in your career? This is your offer! As part of the ERNI team you will be working with Swiss and German customers operating in domains such as finance, security, medical and more. Given the wide spectrum of projects, the technologies used will also be varied, enabling you to use your desktop, backend, frontend and database skills to the maximum. So, when are you going to join us?

Responsibilities

⬜ You will build an application from the ground up that helps scientists translate their laboratory processes into workflows and thereby improve their research and development. ⬜ You will understand our customers' needs and be responsible for developing code solutions in coordination with the product and design team. ⬜ You will write clean code with unit and integration tests to validate code changes and improve the reliability and quality of the product. ⬜ You will follow agile practices, work as a team and ensure timely delivery. ⬜ You will take part in daily stand-ups, planning sessions, and code reviews.

Job requirements

Experience with all below are required: ⬜ Node.js ⬜ JavaScript, HTML5, CSS ⬜ At least one modern FE framework - preferably React ⬜ Unit testing: e.g Jest, Mocha ⬜ Test-Driven Development ⬜ At least one CI tool Github Action, CircleCI, Travis, etc
