
Professional NodeJS Developer with React skills

City: Cluj-Napoca, Remote
Role: Professional

Recruiter name: Borbely Terezia (ERNI)
Recruiter email:
terezia.borbely@betterask.erni

Description

Are you looking for new opportunities? Do you want to grow up in your career? This is your offer! As part of the ERNI team you will be working with Swiss and German customers operating in domains such as finance, security, medical and more. Given the wide spectrum of projects, the technologies used will also be varied, enabling you to use your desktop, backend, frontend and database skills to the maximum. So, when are you going to join us? Access System for Properties Targeted for multifamily residential housing, for property managers and tenants both. Tenants can use their phones to unlock doors, and managers can organize who is renting and so on. The solution includes mobile apps and an Admin Portal, with an AWS based cloud backend.

Responsibilities

The project is about developing an Access System for Properties. The product is targeted for multifamily residential housing, for property managers and tenants both. Tenants will be able to use their phones to unlock doors, and managers can organize who is renting. The solution includes both mobile apps and an Admin Portal, with an AWS based cloud backend. Our part in the development will be focusing on the admin portal and cloud backend:

- Admin Portal is with React and TypeScript, UI library helps
- Cloud Backend is with AWS Serverless, NodeJS and TypeScript, AWS helps, along with relational DB knowledge
