
Professional/Senior Solution Architect

City: Singapore
Role: Professional

Recruiter name: Serrano Zaila (ERNI)
Recruiter email: Zaila.Serrano@erni.ph

Description

ERNI Singapore is looking for Solution Architect to support business development and account management team. Solution architect provides added value to clients by proposing and delivering state of art software solutions and supporting customer transformations in digitalization and innovation.

Responsibilities

- Collaborate with business development and client account teams to provide solution proposals and offerings with distinguished value for our clients.
- Coordinate requests to our Software Delivery Centers to ensure successful services delivery.
- Be first point of contact for client CTOs regarding technical questions, requests and estimates.
- Participate in company strategy to support future and cutting edge technologies.
- Match and/or hire consultants based on requests of clients.
- Review and/or contribute to technical solution proposals before final submission.

Job requirements

- Deep understanding of Software Delivery Lifecycle including different roles and activities (e.g. software engineering, quality assurance, business analysis).
- 5 years of experience in software development industry, ideally in different domains.
- Knowledge of wide range of technologies in different areas, e.g. web development, cloud, IoT.
- Ability to learn and understand new technology trends like Artificial Intelligence, Augmented Reality, Blockchain.
- 2 years of experience working in agile teams.
- Excellent communication and presentation skills.
- High level of analytical assessment. Able to examine client's current systems and determine overall project needs and scope, and able to quickly change direction based on updated client specifications or system limitations.
- Good time management skills. Able to determine development schedules and milestones and ensure that deliverables are completed on time.
- Optional: experience with Digital or DevOps transformation.

Benefits

International work environment
Established ERNI community with learning and team-building events
Continuous skill development
Standardised and established career path
Equal opportunities
