
System Tester for Sportcars

City: Santa Oliva (Tarragona)

Recruiter name: Núñez González Alberto
(ERNI)

Role: Senior

Recruiter email:
alberto.nunez@betterask.erni

Description

Do you want to work on an international Automotive project? Be part of an innovation project to develop software test and validation phase for sport supercars. These cars are updated all their lifetime, so they need to be tested by a software validation team, which define the test cases, setup and monitor the logs and diagnostics. At ERNI we will care about your needs and make things happen by listening to our core value, YOU! You will find domain technical experts that collaborate in creating challenging solutions allowing you to develop yourself and work in the top of your technical expertise.

Responsibilities

- You will manage the development of diagnostics files for each series car program, according to diagnostic protocols, and XCP measurement and calibration protocol.
- You will set up the flashing/configuration tools, and the dataloggers used to acquire the required traces during the tests.
- You will be flashing and configuring vehicle ECUs with the software version to test.
- You will execute the tests by following the test cases included in the test plan and perform customer tests.
- You will analyze the test results, understand the system requirements and use an analytical approach to identify possible issues, creating an accurate and detailed description of the issues.
- You will produce accurate documentation and test reports, managing the hardware and software configurations with appropriate version control.

Job requirements

- You have at least 2 years of experience in Hardware/Software testing.
- You have experience with diagnostic files for embedded systems.
- You are experienced with Vector Tools.
- You have experience with CANoe.
- You are experienced with flashing and configuring embedded components.
- You have good knowledge of electronic or electric engineering.
- You have a good level of English (at least B2).

Benefits

- **Paid and rewarded certifications:** you will be able to learn new technologies to develop as a professional in the areas that interest you most (such as: Agile, DevOps, Cloud, QA, etc.) and be rewarded from 200€ to 1.400€ per certification, in addition to the paid exam.
- **High Value Training:** after a year at ERNI, you will have the opportunity to enroll on +500€ Executive courses, Masters or Postgraduates. 80% of the total amount will be covered by the company.
- **Hybrid working model:** at ERNI we believe in the importance of building strong relationships with our colleagues. You can expect 5 to 6 days per month dedicated to team building and different events at the office.
